Beauty may be in the eye of the beholder, but one plastic surgeon says he knows better.

Julian De Silva, a facial cosmetic surgeon from London's [Centre for Advanced Facial Cosmetic and Plastic Surgery](#), has created the "perfect face" by assembling requests from 1,000 of his female patients from the past ten years, and says he thinks he knows which celebrity features make up all the important parts.

The result looks something like this, which mixes Jennifer Lopez's eyebrows with Keira Knightley's eyes, Miley Cyrus' forehead and Angelina Jolie's cheeks (among others):
